

DENTISTS SERVING PREGNANT WOMEN WITH MEDICAID

Good oral health habits are important throughout your life and during pregnancy.

Please be reassured that prevention, diagnosis, and treatment of oral conditions, including dental X-rays (with shielding of the abdomen and thyroid) and local anesthesia (lidocaine with or without epinephrine), are safe during pregnancy.

Continue with regular dental care appointments and utilize your coverage with the state medical card.

Buenos hábitos de salud son importantes durante su vida y su embarazo. Confíe en que la prevención, el diagnóstico y el tratamiento, incluyendo radiografías (cubriendo el abdomen y la tiroides) y anestesia local (lidocaína con o sin epinefrina) son seguros durante el embarazo.

Continúe con citas regulares al dentista y utilice la cobertura de su tarjeta médica.

For additional information, refer to Oral Health During Pregnancy: A National Consensus Statement, by the Health Resources and Services Administration's Maternal and Child Health Bureau in collaboration with the American College of Obstetricians and Gynecologists and the American Dental Association.
